

MobileNAV app registration in AzureAD

RESPONSIBLE FOR THIS DOCUMENT, CONTACT INFO

Tibor Major | Business Unit Director

MultiSoft Ltd. | Development |

contact@multisoft.hu | sales@multisoft.hu

My app id range is : 50050-50100.

1. MOBILENAV 10.0 MANDATORY APP REGISTRATION UPGRADE.

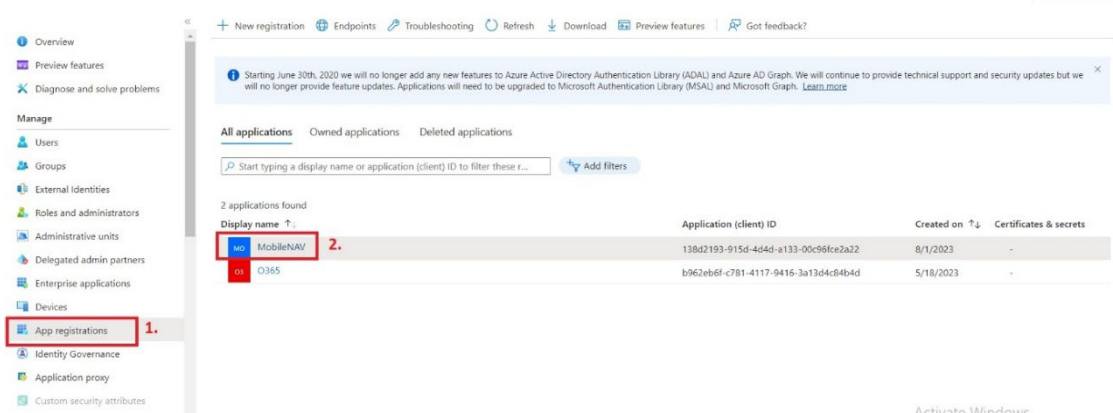

From version 10.0 the MobileNAV's app registration Redirect URI parameter must be changed.

- Old value: <http://mobilenav.com>
- New value: <https://mobilenav.com>

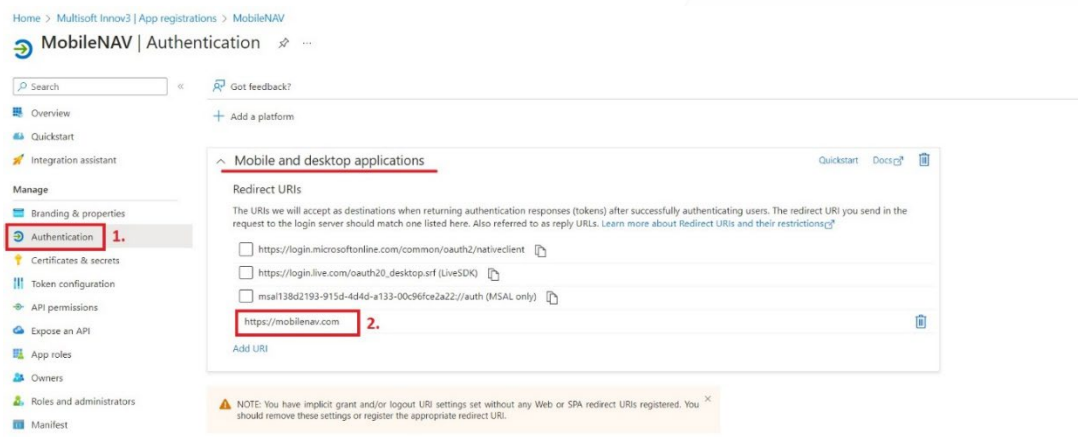

We recommend download the updated application registration script and run it again. <https://mobilenav.com/wp-content/uploads/2023/08/CreateAzureADAppRegistration.zip>

Follow these steps for a manual upgrade:

1. Find and open the MobileNAV app registration on the Azure Active Directory portal.

2. Select the authentication tab from the menu.
3. At the Mobile and desktop applications page section, modify the old <http://mobilenav.com> redirect uri value to the new value: <https://mobilenav.com>

- Alternatively, add the new redirect URI: <https://mobilenav.com> and keep the old one (<http://mobilenav.com>) for backward compatibility. MobileNAV versions below 10.0 can work with the old redirect URI.
4. Press Save.

"Don't forget to change the Login configuration on the clients. It must be the same. <https://mobilenav.com>"
