

How to configure ScanSKU Handheld Devices (R Series) for MobileNAV Android application

1. CONFIGURE SCANSKU HANDHELD DEVICE

- Launch Scanner application (or Scan Settings on newer models)
- Go to Settings tab, and change the Output mode (or Input Model) to Broadcast mode

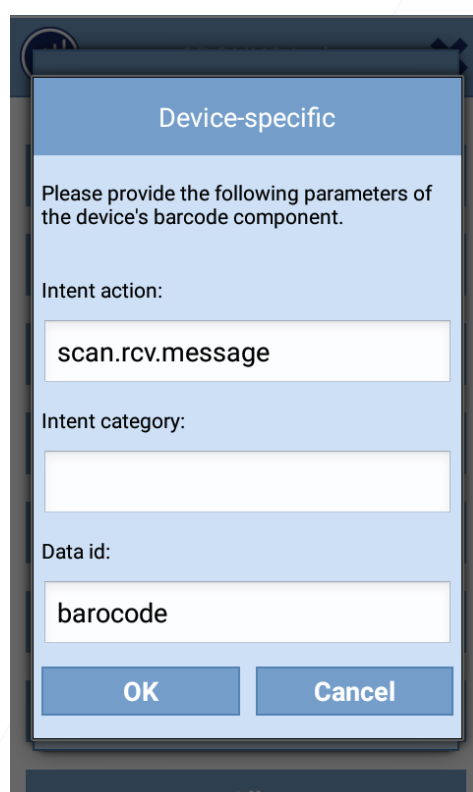

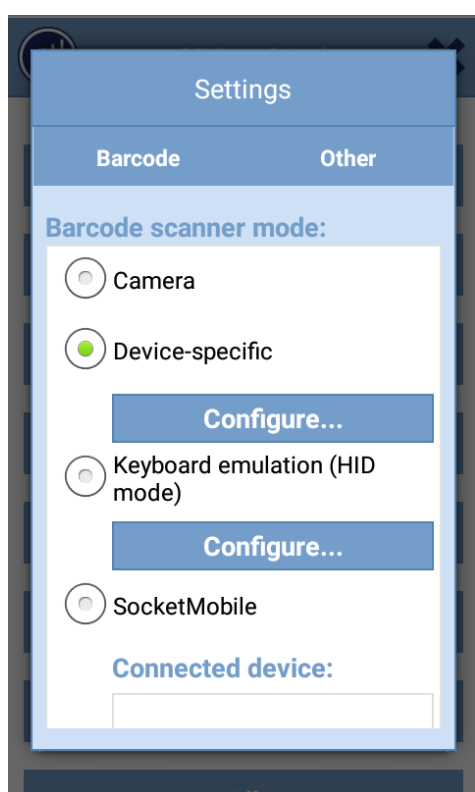

- **Additional content** setting should be **NONE**
- **Append prefix** and **Append suffix** should be empty.

2. CONFIGURE MOBILENAV

- Launch **MobileNAV** application
- Log into online or offline
- Click on main menu(MobileNAV icon on the top left)
 - a. Select **Settings**
 - b. Barcode mode: **Device-specific**
 - c. click on **Configure...** button
 - i. Intent action: **scan.rcv.message**
 - ii. Intent category: (leave empty)
 - iii. Data id: **barcode**

- If the previous setting does not work on newer models, then try it like this
 1. Select **Settings**
 2. Barcode mode: Device-specific
 3. click on **Configure...** button
 - a. Intent action: **com.action.SCAN_RESULT**
 - b. Intent category: (leave empty)
 - c. Data id: **scanContext**
